SUMMARY

Software Engineering Student at Rey Juan Carlos University in Madrid. Through my studies, I have gained a strong foundation in web development, algorithms, and system design.

Besides my studies, I have developed personal projects where I have applied theoretical knowledge to practical situations, strengthening my problem-solving and teamwork skills.

EDUCATION

Rey Juan Carlos University

Bachelor's Degree in Software Engineering
2022 – Actual

Colegio Diocesano María Inmaculada

High School Certificate, Science Track
2020 – 2022

- JavaScript
- Java
- Python
- SQL Oracle
- Git
- Responsive Web Design
- RESTful APIs
- Algorithms

LANGUAGES

Spanish Native

English B2 – First

EXPERIENCE

Notion Lovers

Freelance | 2024

- Implement responsive web design
- Add Notion API integration to serve content from Notion databases
- Manage dynamic routing with NextJS and handle server side rendering of content

Bits Of Battle

Freelance | 2024

- Integrate React.js for designing and rendering the game's HUD to enhance user interaction and experience
- Collaborate with a team of developers to design and implement game mechanics, including player actions, scoring systems, and win conditions
- Utilize Canvas and pixel art assets to achieve high-quality game rendering, enhancing visual appeal and immersiveness

Personal Portfolio

Freelance | 2024

- Implement responsive web design
- Utilize Astro's static site generation capabilities to ensure fast loading times and optimal performance
- Incorporate interactive elements and animations to engage visitors and enhance user experience
